---

Hi Ken,

Thanks for helping me out. If you need any more information on the site you can go to: [www.epaosc.org/Bachman Services](http://www.epaosc.org/Bachman%20Services)

I am having ODEQ send me a request to have EPA review the information and a little more about what they are looking for. I mentioned the Tx numbers and got a little bit of silence so we'll see what they send in...but at this point can only tell you there were fish/turtles in the canal that died and the canal leads to the Oklahoma River which runs through the city and is used heavily for recreation.

I will send the water/soil samples in separate emails as there is some reference attached to each that may or may not be useful.

Even if you don't have time to review all the data, if you can just give me some suggestions of reference numbers to screen the data against, it would be helpful...

Thanks again...
